ABOUT ME:

Before first year of engineering, I never written a single line of Code. but I got fascinated when I wrote my first C Program. but still I never thought about to change my domain but in electricals you have to work with software too along with hardware so I always got tune with programming and after final year I know I have quite of passion about programming and after Panadamic I see how tech is changing so I also take a decision to take tech as my carrer domain and web as my expertise.

AREAS OF EXPERTISE:

- ☑ Front-end & back-end web development
- ☑ Code structure & architecture
- ☑ Web performance optimization
- ☑ Programming languages
- ☑ Database and Security
- ☑ Source control
- ☑ Test driven development

PROFESSIONAL EXPERIENCE:

Trackon Courier Service

Technical Support

- I am the main lead of technical support to my father's office. I provide all the technical Supports Ranging Billing, Wifi,Daily Shipping Entry and Updating.

RELEVANT PROJECTS:

Image Recognization App

- Built This Project using all frontend and backed I learned by myself.
- When User Upload any Image to the app it will Identify the person.
- This App Uses HTML,CSS3,JS,React as Fronend,Nodejs as Backend and database.
- In this Project I also used a Machine Learning API.

Twitter CRUD APP

- This is the biggest first Project I created using React. In this App User and create,edit,updated and delete data. Same as Twitter.

EDUCATION:

2017-2021 | Rajasthan Technical University
